

VIRTUAL
GALLERY WALK
6th -8th grade class

Tejon Ranch
CONSERVANCY

HOW TO DO THIS

- Here is a chance for you to share your hard work AND for you to see what your classmates have done.
- Go to your next BLANK journal page. Write the title: **JOURNAL IDEAS**
 - As you look at others' work, take notes on this page about what you saw that you'd like to add to your next journal entry.

WHEN IT'S YOUR TURN

- When you see a slide with your journal pages, talk about what you were studying and explain what you did.
- Tell what you like about your journal page and what you might change or add next time to make it better.
- Ask for feedback from EVERYONE, if you'd like.

Focus on the Strengths

- EVERYONE: Think about the strengths of the pages you're seeing and ask permission to share your thoughts.
- **Start your comment by saying:**
 - **"I like the way you..."**
 - Don't use the words "good" or "bad."
We are not judging.

Headings

Bee Entry

2 Sept. 2020 - Wednesday
10:04 am - Summer
Fraser Park, CA 4,850 ft
79°F - Clear from clouds

ABC I wonder... if the bee lived a long time such as a few weeks or a couple of months. I wonder when the bee was born.

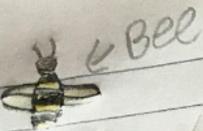

I notice... that the bee's patterns are a mixture of black and white stripes. I also notice that the bee's wings are also a bit yellow.

This reminds me of... the time a bee was on my head and it almost stung me.

123 Measurements

Bee 12 mm long
Wings 9 mm wide
Whole Body 19 mm long

m

Reflection

I feel very happy about this entry because my sketch is my best one yet! I wonder if the bee lived longer than a few weeks or a couple of months. I notice that the bee is a black and yellow striped bee with slightly yellow wings. This reminds me of a bee crawling on my head and I almost got stung.

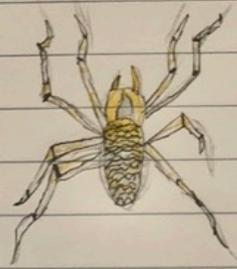

Healing

Californian Orb weaver
Male

1-9, 2020 - Tuesday, 10:30 summer Lebec, CA T.
Sunny N5 mph 3,481.

I wonder where the spider is from. I notice
The abdomen is similar to tree bark.
The long legs remind me of wolf spi.
I notice hints of gold on the
legs.

3.5 centimeters long 2 centi wide

The spider is an orb weaver, but
of the orb weaver is the Golde
Weaver. It is known for being able
catch small birds. The body by itse
1.5 centimeters but all together it
grow up to 12 centimeters.

The flower is
5.3 cm long
2.1 cm wide

Im

reflection

The flow was
unige with a lot
colors and it was
not that hard to
draw, I took it
the ground so I
wouldnt kill the one
on the tree

Oak Sampling Leaf

27 August, 2020, Thursday

10:34 a.m., Summer

Heading

Lebec CA,

81°F, Wind 9mph, 3,481 feet elevation

Clear Skies

ABC

I notice... that it is very green which could mean that it was in good condition. It seems to be very light in weight. The leaves have the same shape.

I wonder... if the tree was in good condition. Was it watered.

This reminds... me of a black bear in Pine Mountain Club.

123

one leaf

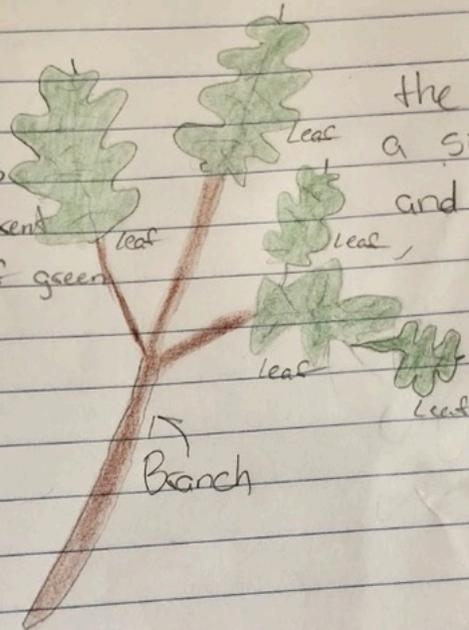

$l = 6.5 \text{ cm}$

$w = 3.25 \text{ cm}$

It seems like it is cracked

the leaves have different shades of green

the leaves have a similar shape and texture

Reflection

I learned that oak trees can reach around 148 feet, they can live up to 1,000 years, and it produces about 10 million acorns during its lifetime. I want to learn a little more about the history of Oak trees.

readings

Lilac Entry

1 Sept. 2020 - Tuesday
10:30 am - Summer

Frazier Park, CA 4,850 ft

79°F - Clear from clouds
a little hazy

ABC I wonder... if the lilac was a fresh new flower that bloomed recently. I wonder when lilacs bloom.

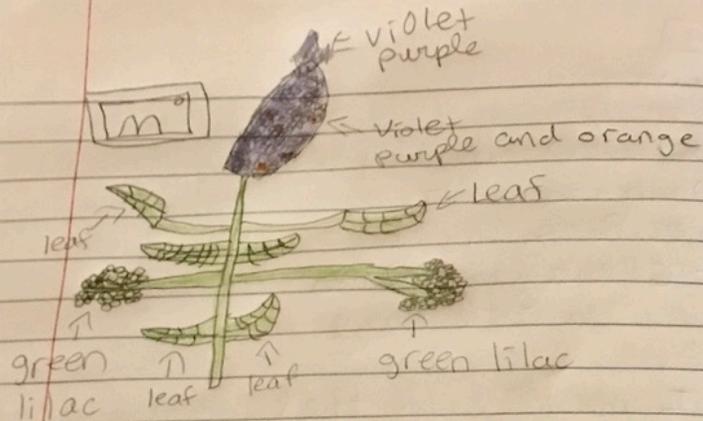

I notice... the lilac has purple lil and green lilac.

This reminds me of... amethyst because the colors are both the same. It also reminds me of

23 Measurements

floral portion: 11 cm

leaves: 7 cm x 2 cm

Reflection

I learned that the floral portion of this lilac is 11 cm. I also learned the leaves are 7 cm x 2 cm. I wonder if the lilac was a fresh flower had just recently bloomed. I notice that the lilac has purple and green portions. There's also a bit of orange. This reminds me of amethyst because they both are the same color.

Dragon Fly

27, August, 2020 Thursday 10:30 Lober, Mountains 737
Sunrise 3,481

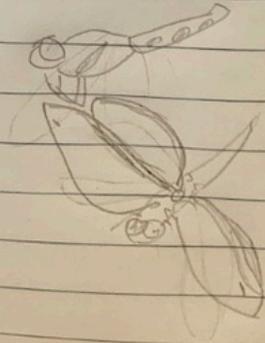

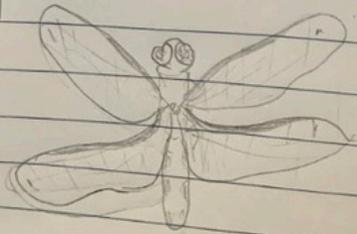

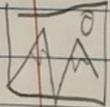

I wonder why the legs shriveled. I notice spots along the dragonfly. There is a amount of fuzz around the wings. I notice the wings are very delicate. The end of the tail is broken.

31cm

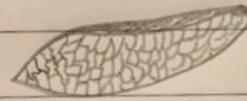

5 wide

3 centimeters long 5 centimeters wide

The wings have a crystal-like part
2 very large eyes.

I would like to know how it as I sound it on the floor of car. Are the wings more or as delicate as the body. What caused it to it so perfectly.

Thanks for Sharing.
